

PVC PROFILE TYPE A Premium

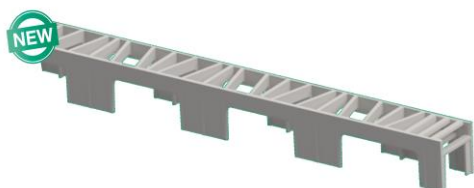

Horizontal plastic linear spacers

REF 03.02.11 - Version V01 – 12/03/2020

Manufacturer's prescriptions

Description

The PVC profiles type A Premium are linear spacers in PE (Polyethylen), intended to ensure a fixed concrete cover between the formwork and the lower reinforcement layer.

The type A profile has lateral recesses.

Application fields

The profiles type A Premium are used as spacers for the lower reinforcement layers for concrete slabs concreted on top of a formwork or on hard ground floors. These spacers are not suitable for slabs bearing on soft ground.

Profile type A Premium is usually placed diagonally to the direction of reinforcement.

Properties

The lateral recesses along the type A Premium profile allow the good penetration of the concrete below the profile and guarantee a good embedding with concrete, in case of the concrete has been properly vibrated.

Dimensions

Length L = 2m
